EDUCATION FOR THE CITY WE NEED

The New Urban Agenda is the outcome document agreed upon at the Habitat III cities conference in Quito, Ecuador, in October 2016 and signed by all UN member states.

The NUA will guide the efforts of a wide range of actors around urbanisation — nation states, city and regional leaders, inter-national development funders and civil society — for the next 20 years.

After the enactment of the document, attention has shifted towards **IMPLEMENTATION**: how to implement its principles?

We believe that universities have a special role in preparing young professional and critical citizens to face the challenge of making our cities sustainable, prosperous, and inclusive.

But in order to do so, we are reaching out to stakeholders from the academic and educational worlds, as well as NGOs, companies and government agencies, to discuss how best to teach and learn issues related to and stemming from the New Urban Agenda.

The TU Delft UTC will discuss strategies, methodologies, literature and practical exercises that can be implemented in

How to prepare young professionals to understand and implement the New Urban Agenda in very diverse national and local environments?

higher education courses in Europe and elsewhere. Our attention is on social, economic and environmentally sustainable urban development everywhere, but the challenges of urbanisation in the Global South are truly urgent.

Our main question is:

This UTC will also be a moment to meet like-minded people, engage in debate and form new partnerships.

This is an initiative from TU Delft in partnership with TU-Eindhoven, IHS-Erasmus Rotterdam, Arcadis and others.

What are UTCs?

The Urban Thinkers Campus (UTC) model is an initiative of UN-Habitat's World Urban Campaign, conceived in 2014 as an open space for critical exchange between stakeholders and partners. It aims to promote sustainable and inclusive urbanization. It is also envisaged as a platform to advocate enlightened planning and design of our cities and propose urban solutions for different contexts of development.
